

# Phonak Bolero™ Marvel

## Love at first sound

A Sonova brand

**PHONAK**  
life is on

# Phonak Marvel™ hearing aids express our commitment to improving hearing without limitations

For over 70 years, Phonak has continuously strived to create hearing aids to improve people's lives. With every new Phonak product, we have pushed the boundaries of hearing technology to create solutions that deliver excellent sound quality, are easy to use and provide a true sense of well-being.

Our latest creation is the result of years of extensive research & development all coming together in one marvelous piece of technology. We have focused our attention on what you want and expect from a first-class hearing aid – a clear, rich sound experience.

With this philosophy, combined with modern technology, we have developed a multifunctional hearing aid that conveys a love at first sound experience.

## Introducing Phonak Bolero Marvel:

- Clear, rich sound
- Connects to smartphones (iOS® and Android™), TV and more
- Rechargeable
- Smart apps

As a Behind-The-Ear (BTE) hearing aid, Bolero M offers maximum reliability and robustness.

# Love at first sound... each and every day!

- Exceptional sound quality from the first fit<sup>1</sup>
- Better speech understanding in noise<sup>2</sup>
- Reduced listening effort in noise<sup>3</sup>
- Top-rated streamed sound quality<sup>4</sup>

When we say **love at first sound**, we don't just mean the first time you try on Marvel, but each and every time you wear them!

From the moment you first put on your Marvel hearing aids, you can expect a sound quality second to none. We have accomplished this by taking the proven performance of our technology and improving it in every way so that your Marvel functions as you would expect, in even the most challenging environments.

This new generation of Phonak technology recognizes and automatically adapts to precisely match more listening situations than ever before.<sup>5</sup> You can enjoy better speech understanding in noise,<sup>2</sup> as well as less listening effort<sup>3</sup> and be amazed at just how well your hearing aids perform in your everyday life.

# What makes Marvel even more marvelous?

Today's technology is like an ever changing landscape. Phone calls, messages, emails, TV and numerous apps are present in our lives. Phonak Bolero Marvel has been designed to effortlessly connect to your everyday electronics while delivering clear, rich sound.

## Smartphone connectivity

Unlike any other hearing aid available, Marvel can connect directly to either your iOS or Android smartphone or other Bluetooth®-enabled phones to stream any kind of audio to your ears. Enjoy true hands-free phone calls with built-in microphones that pick up your voice. Calls can be answered or rejected with a simple push of the button, even if your phone is across the room. In addition, you can even set your phone notifications to be heard through your Marvel hearing aids. And it doesn't stop there – Marvel delivers stereo sound quality streaming for your music, videos, e-books, podcasts and so much more!

## TV and multimedia experience

Phonak Bolero Marvel also features proprietary AirStream™ technology to deliver top-rated sound quality streaming from any TV or stereo system.<sup>4</sup> Enjoy your favorite TV programs and movies with a simple plug and play solution, called TV Connector.

It's just like using wireless headphones – except maybe even better, because Marvel hearing aids can distinguish between streamed speech and music signals, and automatically adjust to give you an optimized sound quality.

## What you can expect:

- Connects to smartphones – iOS and Android
- Connects to a variety of everyday electronics
- Connects to Roger™ microphones and Phonak accessories
- Hearing aids used like wireless stereo headphones
- Full day of streaming thanks to AirStream™ technology

## Boost your hearing performance with Roger technology

In situations where noise and distance affect your hearing, understanding speech can still be particularly challenging. This is where Roger comes in to boost your hearing performance.<sup>6</sup>

Roger technology was developed in 2013, and is regarded today as a wireless digital benchmark. It functions by picking up the voice of the speaker through a Roger microphone and wirelessly transmitting it to the listener while reducing background noise.

Marvel hearing aids feature RogerDirect™ which allows Roger technology to stream directly to Marvel hearing aids without attaching an external receiver. With this unique innovation, you can fully participate in conversations even in very noisy environments such as restaurants, meetings at work and school activities.

### What you can expect:

- Marvel and Roger, the unbeatable solution for challenging listening situations
- Designed to improve speech understanding in noise and over distance
- Discreet and appealing solution

**roger**

# Industry-leading rechargeability

Phonak has pioneered rechargeability in the hearing industry with the introduction of lithium-ion rechargeable batteries. Marvel hearing aids are also available with this technology. They are quick to charge and long lasting. This means no more hassles with disposable batteries! Just charge and go!

Like your cellphone, Phonak Bolero Marvel hearing aids are always ready to go as soon as you slip them on. They switch on automatically when removed from the charger and turn off when placed back in the charging case. Enjoy unlimited hearing and streaming throughout the day, thanks to the power of rechargeable technology.

## What you can expect:

- Ease of use – no more hassles with disposable batteries
- Full day of hearing including streaming
- Super quick charging
- Battery engineered to last 6 years

Available with easy-to-use charging options, including the Phonak Charger BTE RIC with a standard USB-C charging outlet.

## Smart apps

### myPhonak app

This easy to use app is the smartest way to get the most out of your Marvel hearing aids. Thanks to different app functions, you can enjoy the confidence and peace of mind that your personal hearing needs are addressed whenever necessary.<sup>7</sup>

### What you can expect:

- Remote Control: Adjust and control the volume of your hearing aids by selecting a program or scenario and personalize the sound even more with advanced features
- Remote Support: Your Phonak hearing aid can be remotely adjusted, in real time by your hearing care professional
- Hearing Diary: Keep track of your hearing experience and share your feedback with your hearing care professional
- My Hearing Aids: Get more information about your hearing aids' battery status, personalized programs and statistics

## myCall-to-Text app

Keeping up with conversations on the phone can be challenging, especially when background noise is present. Thanks to the hands-free capabilities of Marvel hearing aids, you don't have to hold the phone close to your ear. By using the myCall-to-Text app you can read on the screen in real time what the person on the other end of the phone says. Just like subtitles on TV, you can now read what you hear on your smartphone in more than 80 languages.

Communicate with anyone, anywhere and never worry about missing out on the conversation.

## What you can expect:

- Hear and read your phone calls to confidently communicate
- The other person in the conversation can use any type of phone (mobile, office or fixed line) without having to install the app
- Save the transcription for later review

A free version of the myCall-to-Text app is available. Try it out now!
