Sound BYTES

Welcome Dr. Claire Milligan

We are excited to announce the graduation of Claire Milligan, AuD. Dr. Milligan has joined the staff of Professional Hearing Services & Moreland Ear, Nose, and Throat group. She is enthusiastic, dedicated, and passionate about audiology and is looking forward to working with patients on their hearing healthcare journey.

Congratulations Nate

We would like to congratulate Nate for graduating from University of Tennessee. Nate has taken a position in Florida to pursue his career as an Audiologist.

PerfectDry Lux Hearing Aid Dryer

Electronic dryer is quick, efficient, and easy to use. Compatible with rechargeable hearing aids due to the short 30-minute dry cycle. You can easily dry the hearing aids while getting ready in the morning or during your nighttime routine. Using UV light, forced air, and heat to effectively remove moisture from the hearing aid while sanitizing the devices.

The Dry Lux is great for daily use, especially in the summer when humidity and perspiration can impact the performance of your hearing aids, causing static and intermittency. The small footprint makes it easy to take on the go. The device comes with a three-year warranty.

New Hearing Aids

Starkey Genesis^{AI}

Neuro Sound Technology enables wearers to hear soft sounds without noise, distinguish words and speech more intuitively, and significantly reduce their listening effort.

Utilizing complex pattern recognition with advanced machine learning technology, **it adapts to more listening situations than ever before.**

"I suffer from tinnitus, and I tried the Starkey Evolve IIC and CIC hearing aids and neither helped with the hearing loss and noisy environments. Then I tried the new Starkey Genesis RIC. The clear wire and the small size of hearing aids make them nearly invisible. Now the best news, on the first day I could hear a difference. Using the Edge Mode options made it possible for me to understand conversations in busy environments like restaurants. I travel a lot, and I got the smaller traveling case which allows you to charge the hearing aids three times without being plugged in. This is a great feature." - Patient D.B.

Oticon Real

Oticon Real offers real-life benefits for patients

- Provides access to the full spectrum of real-world sounds
- Offers outstanding detail, clarity, and balance
- Reduces disruptive sounds
- Significantly improves speech clarity compared to previous technology
- Significantly reduces the listening effort caused by challenging listening conditions
- Helps patients stay comfortable and sharp

"Oticon Real was able to really help me hear my family better in loud environments. My family and I enjoy seeing comedy shows together and my new Oticon hearing aids allow me to hear the person speaking better, but not all the background sounds around me. They also have made it easier for me to follow and stay engaged in conversations with my family in noisy environments like at church or the mall." - Patient R.K.
